Option 3: Literacy History Project

I am a minority. On November 30, 2001, I became the daughter of two Mexican citizens who migrated to New York City for a better opportunity at life. What exactly is a minority you may ask? A minority is a culturally, ethnically, or racially distinct group that coexists with but is subordinate to a more dominant group. Over the past few months, we have evaluated different minority groups and the way they have been affected by literacy practices in schools and outside of it. For this essay I was drawn to the minority group that I pertain to which is Latino/Hispanic because it hits so close to home. As for my research, I was pleasantly surprised to learn something new about my minority group and what literacy means to us.
