

Milton Glaser

The 5 things that I learn in the YouTube video on “Milton Glaser: To Inform and Delight” are, one as a kid he was really good of making pictures, two he copy comic books and also Walt Disney, three seeing people buy the painting to him he thinks it is inappropriate, four one of his favorite designs is I heart NY, and five always operate while learning. The most interesting project of Milton is psychedelic. How does type play a important role for Milton of his work by getting inspiration. Why? Because he always had it since he was a kid. Mr. Glaser what he think about Style are lively, and humorous vocabulary combined with psychedelic colors. My personal opinion about the film is that like a design the way you would like a design, and what I learned about being a graphic designer is that always sketch an idea, and work from there.
