

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green color. They are positioned diagonally.

Neighborhood Crime Prevention

Sheliyah Jackson

Police station/ School

In my neighborhood
you can find police
station next to a local
park and outside of a
school with camera
surrounded

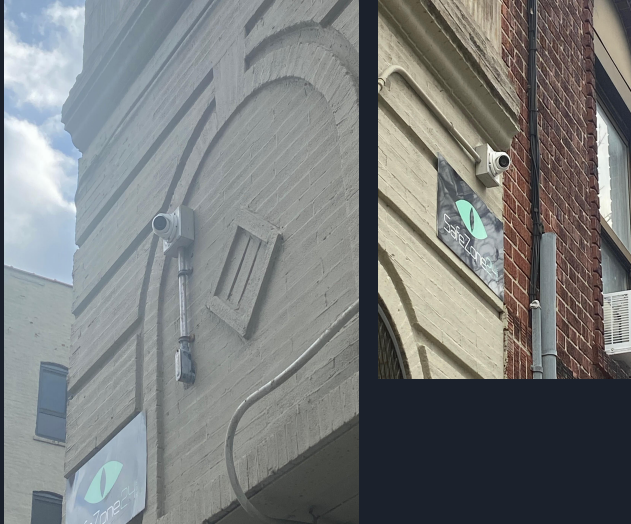

There also a school with bars
around it , and usually someone
locks it at a certain time so no
one can be on the school
premises when school is not in
session

Outside/Inside of the buildings

Usually buildings have there security cameras outside of the buildings that way they can see if someone is trying to break in or if there is some kind of act happening in front of the building

There is also cameras located inside of the building that way if some who doesn't live there got in , they can be able to see there face and be on the lookout if they coke around there again

Summary

As I walked around my neighborhood it's come to my attention that there isn't many crime prevention going on. Besides street light and local cameras there's nothing else that can stop someone from hammering others. Especially when there's lots of kids around this neighborhood due to the parks and schools. People need to be protected
