Professor Satenik Margaryan

In this assignment I have been walking all over my neighborhood to look for measures to fight the crime it has.

I have been living in this neighborhood for more than two years, it is a quiet place that is very close to Long Island, and I feel that it is a place where although certain crimes tend to occur, we as part of the neighborhood and the authorities always look for safety.

Many of our main streets and those leading to apartment mailboxes, general garbage dumps, and parking lots have security cameras and many light poles to decrease the likelihood of theft and crime that can occur.

Also, many of those who live here have their own private cameras pointed at their cars and doors for added security and large headlights to lessen the danger at night.

The front and back of the area have gates and fences that keep it closed off and keep it from being heavily trafficked by people who don't live here, also cutting off access to those who plan to commit crimes in the neighborhood.

Finally, many of us choose to put a double security on the door of our homes, placing another iron door to make it more difficult to access to the houses.

Also, although I could not get pictures of it, in our nearest train station we have patrols and police watching all the traffic in the area, in the same station there is a police department. There are many traffic cameras as well. All this to make things more difficult for those who want to commit a crime.
