Journal of Urban Health: Bulletin of the New York Academy of Medicine, Vol. 82, No. 4, doi:10.1093/jurban/jti077.

This article focuses on how youth violence has advanced, it has changed, we can see that youth delinquency really comes from a community where they don't have a good economy in places that are far from the city, youth violence can also be caused because they have been assaulted, by psychological, emotional or physical actions. Where we can see more youth violence is in men since it can be caused by drugs, by taking care of the neighborhood, generally, violence among adolescents is due to gossip in love relationships.

Delgado, Sheyla A., Laila Alsabahi, Kevin Wolff, Nicole Alexander, Patricia Cobar, and Jeffrey A. Butts (2017). The Effects of Cure Violence in the South Bronx and East New York, Brooklyn. In Denormalizing Violence: A Series of Reports From the John Jay College Evaluation of Cure Violence Programs in New York City. New York, NY: Research and Evaluation Center, John Jay College of Criminal Justice, City University of New York. This article explains how the cure for violence has progressed, we could say that crime decreased a little thanks to the support of Cure Violence, the rates of violence with firearms fell in two neighborhoods that operated the Cure Violence program, in Brooklyn guns of fire decreased by 50%, in the South Bronx shootings decreased. Finally, thanks to the support of Cure Violencia,

violence among young people was decreasing and was the best for them among other neighborhoods.

Underground Gun Markets and the Flow of Illegal Guns into the Bronx and Brooklyn: A Mixed Methods Analysis Anthony A. Braga & Rod K. Brunson & Philip J. Cook & Brandon Turchan & Brian Wade, The New York Academy of Medicine 2020.

This document shows us all the investigations into the illegal guns that the NYPD recovered from the Bronx and Brooklyn, the sales are by out-of-state retailers, since the guns go through many more people to get to someone else Firearms from York City, the Bronx, and Brooklyn were far more likely to be purchased first by a non-owner buyer than to originate from FFL. In the more remote neighborhoods of the Bronx and Brooklyn, they suggest that the flow of illegal weapons into these neighborhoods is much greater. Gang members reported easier access to weapons

in relation to subjects who are not part of a gang. Looking for a solution for the minority of guns, one possibility might be a background check for gun transactions. New York City has been successful in reducing the use of guns in crime, but current studies suggest that they could do more to reduce guns.
