

## ECE 211 Curriculum Web: Theme Planning Worksheet

### Theme: animals

**Sub-Theme 1:**

What kind of animals live in the zoo? What animals live in the forest?

**Sub-Theme 2:**

What type of animals can you have as a pet?

**Sub-Theme 3:**

The kind of animals in live in the water and the ones that live in the land

**Sub-Theme 4:**

The animals that live on the farm.

**Sub-Theme 5:**

Different shapes and colors of animals

**I am interested in this theme because...**

I think kids can learn a lot from understanding animals because children are always surrounded by animals around them. Also, the children can learn about different animals in different environments. Showing children not all animals are the same and that all animals are unique and unique quality about themself.

**Through this theme students will discover...** Through this theme children will learn about pattern, shapes, numbers, and more education things as well. In this activity children will see some subjects collide with other subjects. I like math and science because we can talk about the many animals living in the environment and what type of environment the animals live in.

**The sub-themes will support student learning this big-picture topic by...** talking about understand more about animals and talking things they didn't know about animals. I want kids to learn about animals and be educated as well.
