

Do you want to be an ECI (infant/ toddler) or ECP (preschool) major? Why?

I want to be a ECP major instead of ECI. I enjoy watching the development of preschool children as they are learning the world around them. I enjoy watching them learning how to use their little bodies, I enjoy watching them build relationships with other friends, and watching them think about new terms and concepts.

What qualities do you have that will help you be successful working with your chosen age group?

Definitely need patience, educational understanding of their developmental stages, professionalism, nurturing and fun

What skills would you like to develop that will help you be more effective working with that age group?

I would like to develop the more educational aspect of their developmental stages. With me understanding the science behind their development it'll help my observations and understanding in the classroom.

What are your career goals?

I want to be a director of a preschool

What steps will you take to achieve those career goals?

1. Get my masters in early child hood education
2. Continue working with children
3. Gain more knowledge on worksite expectations
4. Can more experience on how to train and manage staff and children
5. Understand more ways of how to build connections with families

What steps will you take at BMCC to help you reach those goals?

1. Continuing my associates in ECE
2. Utilizing the library for books to help broaden my knowledge
3. Use my peers as resources
