- Social/Emotional Development (Slide 6)
- Cognitive Development (Slide 9)
- Language Development (Slide 12)
- Conclusion (Slide 15)

Physical Development

Physical Development

Descriptive Review

Waron is very physical. He likes to dance, jump and play. Waron can feed himself and he is also a independent 2 year old. I noticed that waron can kick a ball by himself and he can also climb things by himself but sometimes he would lose his balance and then he'll need help of an adult.

Social/ Emotional Development

Observation

Waron was playing with the toy logos trying to make a “car”. One of Waron classmates came next to his table and asked Waron what is he making and can he play with him Waron said “Yes”. As waron put the legos together to make a car his classmate knocked the big car down. Waron screamed. Waron looked at his classmate and then said “Can I make it one more time and then I will give you a chance”.

Descriptive Review

Waron temperment for a 2 year old was very impressive. I say that Waron temperment was very impressive because of the way waron reacted. Since he's only 2 years old I thought Waron would reacted different but he didn't. Waron isn't shy, He's always smiling and he always wants to give you a hug. Waron Loves to help. When Waron is sad or upset about something he would put his head down.

Cognitive Development

Observation

Waron's loves to play with the toy blocks. As I observed waron I noticed that he loves cars so much when it is time to play with blocks Waron always wants to make a car. Waron sorted out some shapes he then used a rectangle and 2 circle as wheels and said to me "look, toy car".

Descriptive Review

For a 2 year old Waron is above average I say this because he is able to sort shapes out he knew what he wanted to do. He is very smart once waron becomes familiar with words from a book he is able to repeat it.

Language Development

Observation- Running Record

11:00am: Waron and 3 other children were sitting at the play table together. They were using toy cars and also legos.

11:03am: "Can you pass me the red car" waron asked one of his classmates

11:04 am: His classmates passed him the toy car Waron began to play by himself

11:07am : Waron asked the classmate to play with him he approached him and said "can you play with me".

11:10: His classmates got up and began to play with him, they worked really well together.

Descriptive Review

Waron communicates very well with children even though he is very independent you can tell that he isn't scared to make new friends. He is very intelligent he has good problem solving skills. He has a good imagination also because he made a toy car from just using blocks I found that very impressive.

Conclusion

Observing and descriptive review can help you get a few view of children because each developmental domain is broken up, each domain can tell you something different
