

## 21.1 Collective Behavior

Collective behavior is noninstitutionalized activity in which several people voluntarily engage. There are three different forms of collective behavior: crowd, mass, and public. There are three main theories on collective behavior. The first, the emergent-norm perspective, emphasizes the importance of social norms in crowd behavior. The next, the value-added theory, is a functionalist perspective that states that several preconditions must be in place for collective behavior to occur. Finally the assembling perspective focuses on collective action rather than collective behavior, addressing the processes associated with crowd behavior and the lifecycle and various categories of gatherings.

## 21.2 Social Movements

Social movements are purposeful, organized groups, either with the goal of pushing toward change, giving political voice to those without it, or gathering for some other common purpose. Social movements intersect with environmental changes, technological innovations, and other external factors to create social change. There are a myriad of catalysts that create social movements, and the reasons that people join are as varied as the participants themselves. Sociologists look at both the macro- and microanalytical reasons that social movements occur, take root, and ultimately succeed or fail.

## 21.3 Social Change

There are numerous and varied causes of social change. Four common causes, as recognized by social scientists, are technology, social institutions, population, and the environment. All four of these areas can impact when and how society changes. And they are all interrelated: a change in one area can lead to changes throughout. Modernization is a typical result of social change. Modernization refers to the process of increased differentiation and specialization within a society, particularly around its industry and infrastructure. While this assumes that more modern societies are better, there has been significant pushback on this western-centric view that all peripheral and semi-peripheral countries should aspire to be like North America and Western Europe.
