Hello professor !

I don't think you realize it, but you were such a huge influence on me this year. You've made me so excited and passionate about the rest of my degree. Thanks so much! And I hope when the college open I can meet you !

Have a great summer professor Protopopescu !

Hi Ichraq,

Yes, it does. Congratulations! I'm sorry I got distracted and now realize that I did not actually enter the grade in the column!
It is up now.

Best,

Tudor Protopopescu

Hello professor!

Thank you for letting us know .

I have a question please, I got 84,5%

Is that mean A ?

Thank you

Hi Everyone,

In your grade center you should now be able to see a new column called "Final Grade". I have calculated the final grades based on the work that I have. If you have submitted everything then what you see in the "Final Grade" column is what I will enter into CUNYFirst in a few days.

If your grade has a "?" next to it it means that there is still some work left to submit, which would change your final grade, so what I have entered here is an estimate. If you do not submit what is left, and have not talked to me about an incomplete, then what you see is what I will enter into CUNYFirst. If you have any questions let me know!

If you want to talk to me about your grade, I will be online, in my Zoom session (same as the class link), on Tuesday 9-11.45. Of course, you can always email me too.

Here is the zoom link again:

Quite honestly, it's not so bad, a bit slow at times however not too much of a inconvenience and has been fine in submitting work. Only issue we run into quite often is collaborate, but this class is asynchronous so there was no issue with connection, audio, and or downloading files from chat that I run into with my other classes. This class has been the most enjoyable for me this semester even though it is writing intensive, it has been a break from my 3 science classes and possibly kept me sane.

I see it; not sure why it didn't get a check, sometimes Blackboard seems to have trouble saving things!

May I ask, what has your experience been with Blackboard? It is not always clear to me what it looks like for students, how easy it is to use, to figure out etc. (On the teacher side it is kind of a mess, very clunky, slow, and inefficient) Do you think it has made the course easier or harder to navigate than it could have been?

I am just curious.

Best,
Tudor Protopopescu

There was something I submitted on 5/9, 11.3 which is a better theory that was never graded. I'm just curious as to if it didn't go through for what ever reason. Usually everything gets a check, but this never had.

Final Exam, Essay and Farewell Professor

From: **Brandon Juarez** <brandon.2100@live.com>

To: **"Tudor I. Protopopescu"** <tprotopopescu@bmcc.cuny.edu>

Date: **5/18/22 1:39 PM**

Hello Professor its Brandon Juarez from your Critical Thinking CRT 100/PHI 150 Writing Intensive class. I wanted to tell you that I have submitted my final exam work and essay. Also, I wanted to take this moment to say you were one of the best professors I had. You explained everything the best and responded so well. I took philosophy once before and also enjoyed it. But you made me like it even more. As Confucious once said "They must often change, who would be constant in happiness or wisdom". Farewell Professor, I hope you still teach in the future.

To: Borough of Manhattan Community College

In 2023, I was a student in “Critical Thinking” CRT 100 0908[38405] (Borough of Manhattan CC) at Borough of Manhattan Community College – City University of New York. Professor Protopopescu takes great satisfaction in upholding the highest standards of academic integrity that students all want our teachers to possess. He was amiable and considerate with all students in the classroom, demonstrating a kindness and empathetic nature. If someone did not know an answer he would gently give more examples and explanations and in the end the students would understand and be able to give the right answer.

He is very engaging and makes sure to keep things interesting using for example astronomy and other interesting topics for examples. Professor Protopopescu also used critical thinking in showing us how to determine our decision making in real life situations. I loved it and I miss the class already. I wish it went on longer..

If you require further information, please feel free to contact me.

Sincerely,
Student at Bmcc
